

Meet Godigitag, the electronic Baggage Tag designed to revolutionize your flying experience.

Centred on the passenger experience, Godigitag by Nikitek Systems Pvt Ltd is a disruptive, green and digital technology solution which aims to transform air travel by replacing the paper baggage tag with a NFC based, RFID enabled, eco-friendly and battery less electronic baggage tag thus promising a hassle-free digital experience to the passenger.

Nikitek Systems Pvt Ltd

goDiGiTAG Technical Specifications

Battery	None
Display Size	3.7"
Comm Frequency	13.56Mhz
Display Refresh time	8 Seconds
Comm Standard	ISO 14443-A-3
RF Frequency	2.4Ghz
Environmental Protection	IP67
Chipset	Nordic NFC

Benefits of using Godigitag

For Passengers

- Skip the frustration at the airport check-in desks & start your journey with goDiGiTAG.
- Drop and go, no queues, no fiddling with paper tags.
- Puts passengers in control of the full check-in process at a time and place that suits them.
- Bag tracking.
- Affordable: whether purchased by passenger, sponsored by airline or a third party.
- Can be used on bag of choice for journey and on any airline.
- Alerts you when your bag is arriving, no more crowding around the carousel
- Extremely user friendly inspite of being Hi Tech, even for the first time set up

For Airlines

- Completes off-site check-in including tagging bags – outsources process fully to passenger.
- Rapid throughput at airport enhancing passenger experience of airline.
- Operational efficiencies delivering cost savings.
- Better IROPS processes (irregular operations, e.g. retagging bags when flights missed etc).
- Compatible with all existing airline and airport infrastructure.
- Low capex with high ROI – fits existing investment in bag drop technology and RFID tracking.
- Green alternative to paper tags

HOW goDiGiTAG WORKS

Dropping off your baggage is the only thing you need to do at the airport.

Check in with our partner airline and generate the electronic goDiGiTAG on your device

Sync your device with the goDiGiTAG on your check in baggage and tag it

Pick up your baggage at your destination and enjoy your stay

Drop off your baggage at any of the baggage drop off counters

goDiGiTAG FEATURES

Touchless

goDiGiTAG uses Near Field Communication (NFC) Technology for touchless operation.

Batteryless

goDiGiTAG is completely battery-less & connects seamlessly with any smartphone. No battery means no fire hazard & no issues with airport security

Check-in & Label Simultaneously

Label your baggage at the same time as checking in for your flight on your smartphone or other devices.

Smart

Interoperable. goDiGiTAG can be paired with any device and can be attached to any piece of luggage with a smart locking/unlocking mechanism

Rugged

Heavy Duty IP67 ABS casing means it can withstand the toughest handling conditions making it virtually indestructible.

Secure

Tamper proof with 128 bit data encryption

Tracking RFID

Passengers can get proximity alerts on their smartphones and receive alarms when their baggage is out of range. (IATA Resolution 753)

Global Compatibility

Can be integrated with any Departure Control System of any airline

EInk Display

Long life. Can be used for generating upto 10000 electronic labels
